Address:

Buena Park

Price:

200.00 \$

The unit works well, and all the lamps are in good working condition. The power is currently connected directly to a dryer-type outlet. However, it needs new shocks (2) as it is difficult to open the top due to being in storage for quite some time. The shocks cost \$20 at Amazon for a pair (not included)

You can also connect the power directly to an electrical box with its own breaker and add a switch for convenience.
